

# Wallet Card Front:

## *Partners In Care*

### **Remember, When Hospitalized...**

- 1. Tell all healthcare workers and visitors to wash or sanitize their hands.**
- 2. Tell your doctor if you have recently been: hospitalized, admitted to a nursing home, exposed to or treated for MRSA, or currently have an infection (for example urinary tract).**
- 3. Discuss informed consent and ask your surgeon about infection rates and antibiotics.**

# Wallet Card Rear:

- 4. Know all your medications.**
- 5. Check your skin around the I.V. for any redness or swelling.**
- 6. Urinary catheters should only be used when necessary; not for convenience.**
- 7. After discharge, check your wound site for any redness, swelling or drainage if you have pain.**
